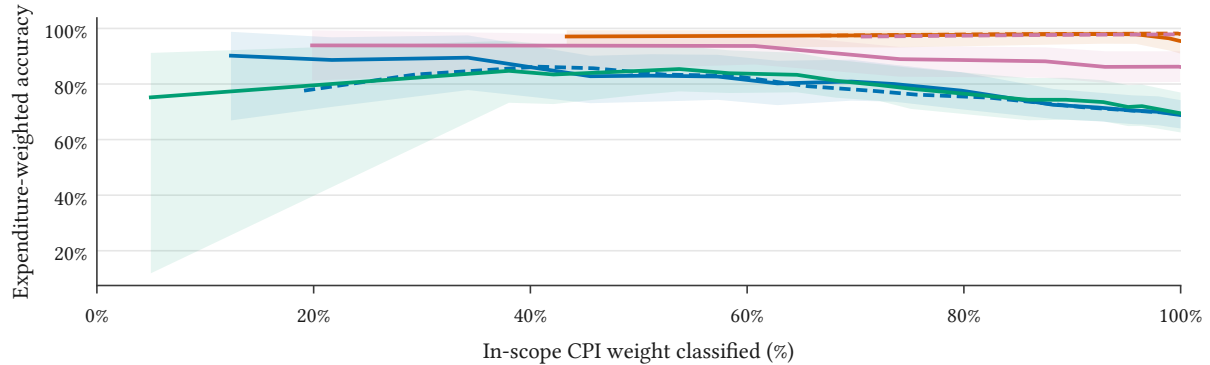
At full coverage, Claude Opus 5.5 classifies 98% of CPI weight correctly



Source: TPSO consumer price indices and weights (base 2566); Open Food Facts (ODbL); TPSO price-collection specifications (MOC open data; official labels, held-out split); author's calculations.

Note: Accuracy is on the classified products; those below a confidence threshold are left unclassified. Bands (first method of each family): 95% stratified bootstrap (1,000 resamples). Weights: equal split within residual cells.
