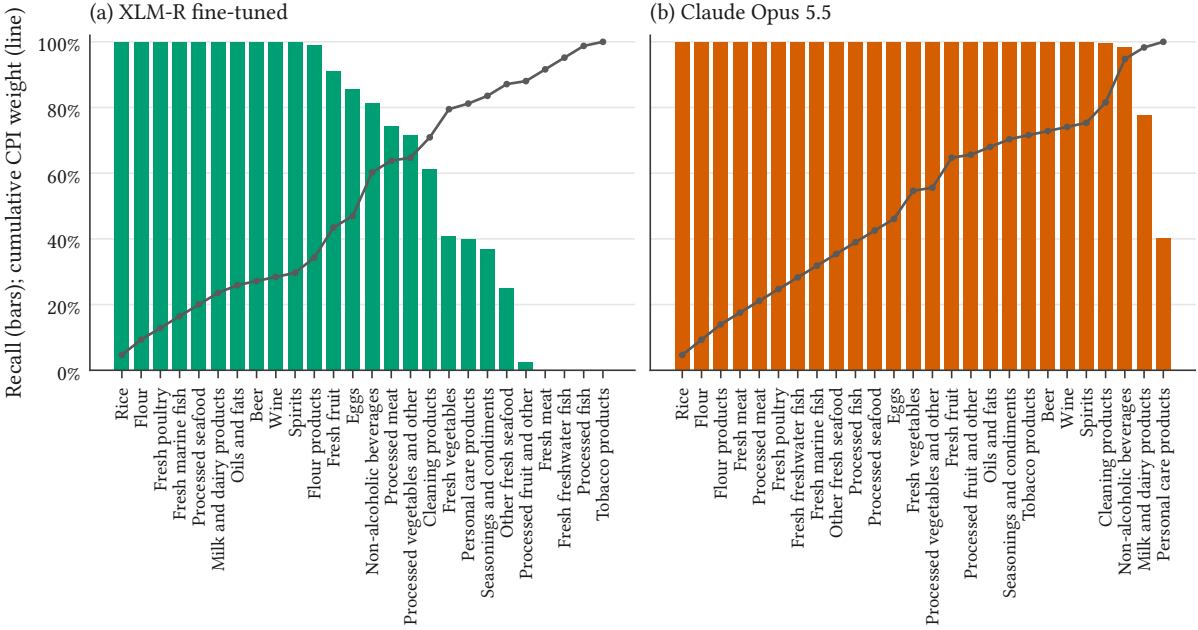
29% of in-scope CPI weight sits in items that XLM-R fine-tuned recalls less than half the time



Source: TPSO consumer price indices and weights (base 2566); Open Food Facts (ODbL); TPSO price-collection specifications (official labels; held-out split); author's calculations.

Note: Bars: share of each item's held-out official specifications classified correctly; grey line: cumulative in-scope CPI weight in bar order. Items without specifications are omitted.
