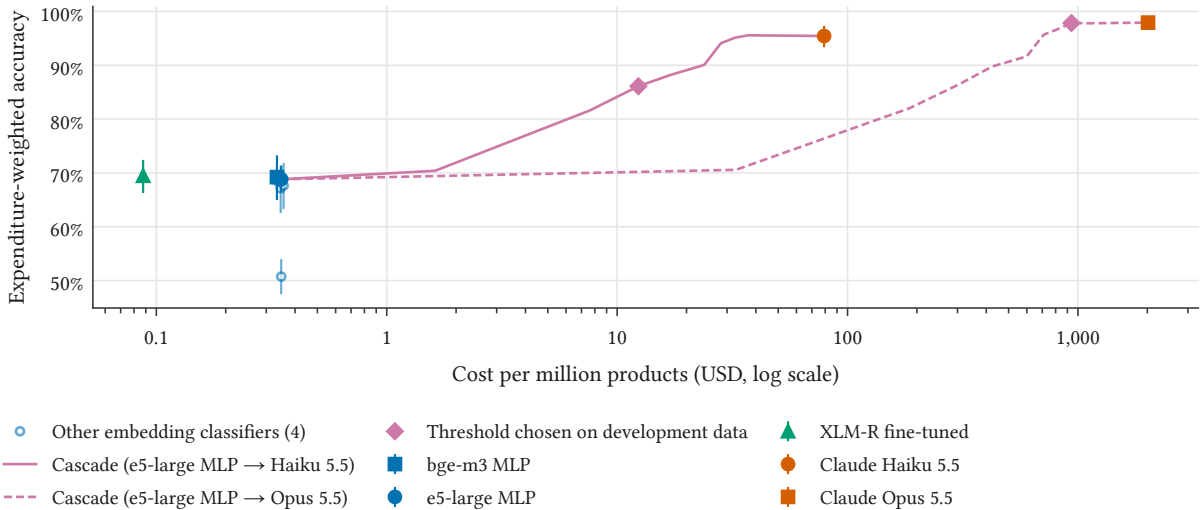
A cascade comes within 0.1 points of Claude Opus 5.5's accuracy at 47% of its cost



Source: Open Food Facts (ODbL); TPSO price-collection specifications (MOC open data; official labels, held-out split); Anthropic API price list; author's calculations.

Note: Full coverage throughout. API cost measured per call; local compute at an assumed USD 1.00 per GPU-hour. Lines: the cascade over its thresholds; at the chosen threshold the Claude Opus 5.5 cascade routes 46% of products to the LLM.
